

The Legal Mechanics' Law Library: Rodell Wing

Author : Brian M. Stewart

Date : May 15, 2014

The Legal Mechanics' Law Library is designed to promote access to all of the scholarly literature on legal scholarship. The goal is to further the craft of legal writing by tracing the history of legal scholarship. What makes for a good law review article? What makes for a good law review? Many have tried to answer such questions over the years. Rather than try to answer this question myself, I instead provide the materials for anyone interested in cultivating a better understanding of the role legal scholarship has played over the past century. For more on the project and easy access to the other wings, visit the [Library homepage](#).
